

Prior to their merger with John Radcliffe & Sons, JTA Construction built a health centre for us on the outskirts of Huddersfield. This was completed on time, on budget and more importantly to the client, to a very high standard. We were very impressed with their professionalism, and since their merger with Radcliffe's, we recently completed a contract which involved the construction of a 50,000 square foot industrial unit near Worksop.

This was of the same standard and I would have no hesitation whatsoever in recommending them for any building works you may have in mind.
