

We recently relocated our premises from Heckmondwike to Brighouse and had extensive alterations, new buildings and renovation carried out by John Radcliffe & Sons Ltd. Our new two storey office block was erected to very high standards throughout and was completed on time and well within the very competitive price structure. All the works carried out, such as constructing vibration pits for our flying shears and concreting large areas of our new yard were carried out efficiently and professionally. We would have no hesitation in recommending John Radcliffe & Sons Ltd for any building work, whatever size, you may have in the pipeline.

Roger Firth
Managing Director, Firth Steels
