

Prior to their merger with John Radcliffe & Sons, JTA Construction built a health centre for us on the outskirts of Huddersfield. This was completed on time, on budget and more importantly to the client, to a very high standard. We were very impressed with their professionalism, and since their merger with Radcliffe's, have recently entered into a contract with them to build a 50,000 square foot industrial unit near Worksop, which, as of going to press, is nearly complete and of a similar standard. I would not hesitate in recommending them for any works you may have in mind.
